About us

We harness information, communication and technology to deliver the best enterprise services available in the region.

Our focus is provision of world class ICT business solutions to our clients. This includes software, hardware and related accessories and solutions.

We have in place a team of highly qualified and dedicated personnel who are backed by industry vendors and leading associates.

We enable our clients to seamlessly integrate the best-of-breed solutions for Enterprise Computing and Storage Systems, Business Communication & Collaboration Solutions, Enterprise Security Systems and Data Centre Services.

Why us

The solutions we represent, implement, and support are designed to launch customers from their current state into a more mature IT arena, setting them above competition. We strive to build quality solutions that bring efficiency, effectiveness, and return on investments.

We work with several clients in multiple geographies and business verticals ranging from small to global enterprises as well as public sector, Education and healthcare.

Our Unique Selling Point includes high investment in building technical competency for our engineers to meet the ever-changing needs of our customers in a highly competitive ICT world.

Mission

Our Mission is to develop ICT Solutions in Africa to global standards with our expertise. We would like to be the partner of choice for organizations in this region by creating and building sustainable ICT enterprise solutions that are reliable, cost effective and are focused on meeting customers' agile business needs.

Vision

To be a leading provider of cutting-edge ICT solutions and services

Values

Our leadership team inspires by example by promoting team work, we have consistently achieved our goals which reflect our shared vision and commitment.

1. Entrepreneurship

2. Customer focus

3. People focus

4. Innovation

5. Performance

6. Professionalism

Our Expertise

We deliver the best ICT enterprise services available in the Region. Our solutions are crafted to suit your unique challenges to ensure you gain competitive advantage.

A. Data Center / Enterprise Infrastructure Solutions

Sidnet has been empowering Enterprises to achieve their business outcomes with Industry-leading and proven Enterprise Information Technology solutions.

5. Cyber Security Solutions.
6. Enterprise Storage Solutions.
7. Backup and Business
8. Continuity Solutions.
9. Workplace solutions:
 - A. Desktop/Application Virtualization
 - B. Mobile device management

IoT Solutions

With more and more devices and objects being connected to the internet, Organizations can be supported to control and utilize them such that it drives positive business outcomes.

With one intelligent network infrastructure, you can improve operations, increase safety and security, and gain valuable data insight to streamline automation.

IoT will impact your bottom line simply by reducing expenses and improving efficiency and gives many organizations a strategic advantage over the competitors in the next decade.

B. Data Center / Enterprise Networking and Infrastructure Cabling

Sidnet designs, install and service structured cabling solutions for companies that expect expert installation and project guidance to help them make the best decisions for their cabling objectives.

Our approach to enterprise networking focuses on:

1. Data Centre Networking (Copper and Fibre)
2. Enterprise campus and branch
3. High-end routing and optical
4. DC Cabinets with its Cable Management Accessories

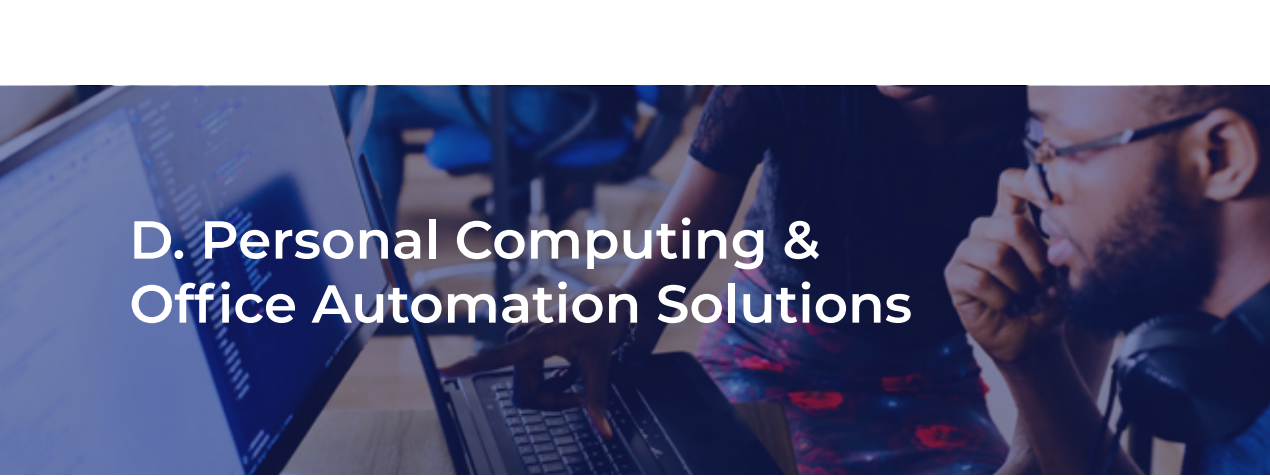

C. Data Center / Enterprise Security

We help our clients to choose the right mix of security solutions that can enhance business operations, decrease service delivery degradation and prevent downtime.

Our IT Security Solutions aim at being

1. Threat Intelligent solutions- to bring visibility into your enterprise activities – DETECTION and AWARENESS
2. Threat Combative Solutions- to prevent threats – PREVENTION
3. Threat Informative Solutions- ability to make organizations aware of threats within them- INFORMATIVE

D. Personal Computing & Office Automation Solutions

Information Technology in true sense is a combination of Applications, Data and ICT Infrastructure. Infrastructure provides the necessary vehicle while data creates the necessary knowledge repository, Applications provide necessary business drivers to help achieve results expected.

1. Public Sector Revenue Management Solution (PSRM)
2. e-Government
3. Integrated Services
4. Core Banking and Financial Applications

E. Unified Communications, Collaborations & Contact Center Solutions.

Sidnet helps customers to build both wired and wireless robust network infrastructures so that collaboration tools are available 24x7x365. By using IP-Telephony, we have helped our customers cut costs of communication while providing necessary access points.

Nothing replaces effectiveness of face-to-face communication, and hence we help our customers get their workmates together through Video collaboration to have more intimate communication thus building better work relationships.

F. Banking & Payment Solutions

Our banking solutions cover all aspects of banking - from retail, to corporate, to universal. Our solutions have the breadth of functionality you would expect for the most sophisticated banking requirements, combined with the market's leading digital channels. The connected front, middle and back-office will transform your bank into a customer-focused, profitable sales machine.

12. Enterprise Content Management (ECM)
13. Supply Chain Management (SCM)
14. Human Capital Management (HCM)
15. Customer Relationship Management (CRM)
16. Document Management Systems (DMS)

I. Cloud Infrastructure Platforms

Cloud infrastructure platforms have obvious benefits of cost-saving, but we think, the real value is the ability to concentrate and provide continuous improvement on what your company is good at, rather than getting lost in the complex world of managing IT infrastructure.

Contact us if you are looking for locally build cloud data center solution as follows:

1. Infrastructure as a Service (IAAS)
2. Platform as a Service (PAAS)
3. Software as a Service (SAAS)
4. Communication as a Service (CommAAS)
5. Anything as a Service

We differentiate compared to the public cloud as follows:

1. In-country cloud, you know where your data is residing physically
2. Compliant with government regulation to keep data in-country
3. No network latency
4. Access your data securely
5. Highly Experienced engineers to ensure 24 x 7 support

H. Enterprise Purchases

Our retail division is indeed a technology supermarket. Some of the products that we stock include:

1. Servers
2. Laptops
3. Desktop Computers
4. Tablets
5. Photocopiers
6. Printers
7. Networking equipment
8. Computer Accessories
9. Security Software
10. IT Consumables
